

## YOUNG PRACTITIONERS MASTER CLASS AT WCCI 2013 „MANAGEMENT OF PATIENTS WITH HIGH-RISK ACS”

**17<sup>TH</sup>-18<sup>TH</sup> April 2013**

**LOCATION:** Intercontinental Hotel, 49 E. Plater St., Warsaw – Poland

**ROOM:** Rubinstein/Chopin (3<sup>d</sup> floor)

**LANGUAGE :** English

### **Target attendees:**

Young Interventional Cardiologists aiming to become independent in angioplasty.

### **Course directors:**

Robert J. Gil, Jean Marco, Adam Witkowski.

### **Course trainers/facilitators:**

Davide Capodanno, Gregory Ducrocq, Jerzy Pregowski.

### **Learning objectives:**

At the end of the PCR Seminars the participants will understand:

- Why a clear step-by-step reasoning process is the key to developing the best management and technical strategy for each patient, when considering the clinical situation, and in the light of local experience and best available evidence.
- What are the elements of the decision making process, from initial patient presentation, through therapy selection, device placement, and potential complications and patient follow-up. (Integrating ESC “Guidelines on Myocardial Revascularization”).

### **The program will include:**

- Interactive discussions using “Live in-a-box<sup>®</sup> cases” and videos of complex cases.
- Use of a specific interactive tool for a very dynamic learning process.
- Debates and different views between participants and experts.
- Case review workshop facilitated by experts.
- Step by step reasoning approach.

## PROGRAM AT A GLANCE

### DAY 1, Wednesday, April 17, 2013

**12:30-13:00** Welcome: Outline of the Programme and rules  
**What? Why? How?**

**13:00-15:00** **Part 1 – Management of an elderly patient presenting with NSTEMI**  
**Global appraisal of our patient.**

Step-by-step analysis of all potential co-morbidity factors

- Clinical presentation.
- Key biochemical markers.
- Key diagnostic tests.
- Angiogram.
- How to anticipate potential complications?
- Consensus and key message.

**15:00-15:30** **BREAK**

**Decision making process**

**15:30-16:30** **Synthesis / lecture**

How to analyse and reflect on A major published study on this topic.

**16:30-17:30**

- Which strategy for our particular patient?
- Which material (guiding catheter, guidewires, balloons, DES)?
- Some tips and hints for a successful outcome.
- Consensus and key messages.

**18:30** **WRAP UP – End of Day 1**

### DAY 2, Thursday, April 18, 2013

**8:30-10:00** **Part 1 – (continued)**  
**PCI Procedure**

- How to overcome difficulties?
- How to solve the most frequent issues?
- How to assess the result?
- Consensus and key message.

**10:00-10:30** **BREAK**

**10:30-12:00** **Part 2 – Management by PCI of an elderly patient with STEMI**  
**Phone contact**

- Key information / Transfer.

**At admission**

- Patient's appraisal.
- Clinical status.
- Biochemical markers.
- Angiogram.

**12:00-13:00** **LUNCH**

**13:00-14:00** **Synthesis / lecture**

„How to analyse and reflect on A published study“

**14:00-15:30** **PCI Procedure / Thrombo aspiration**

- How to overcome difficulties?
- How to solve the most frequent issues?
- How to assess the result?
- Consensus and key message.

**15:30-16:00** **End of ebac accredited session**

Evaluation and take home messages.
